The Concept of Picture

Picture is one of the visual aids. Pictures are used to support and help a teacher to interest the students because it is considered as a part of visual aids that have many functions in the teaching process. A number of experts propose their opinions and ideas related to the picture. Collin (1979) picture is a visual representation of something, such a person of scene, produced a surface as photograph, painting, etc. Mifflin (2000) states that pictures are a visual representation or image painted, drawn, photograph or otherwise rendered on flat surface. C. The Procedures Of Teaching Writing News Item Text By Using Thematic Picture.

Preparation

There are many things that teacher has to do in teaching writing news item text by using thematic picture. They are as follows:

a. Selecting the teaching material

It is very important for the teacher to select the material that will be used or taught
for the students. The selected material will help the teacher to achieve the teaching learning goal.

b. Learning the material

The teacher has to read and comprehends the material before using them in teaching writing. The teacher should understand about the material, more over the teacher knows how to teach the material to the students.

c. Preparing the teaching material

To make the teaching learning process easy, it is better for the teacher to use their teaching material such as picture, and the teacher should prepare or show the thematic picture. Picture can make the students interesting in teaching learning process.

To make the classroom activity more interesting and successful, good preparations are really needed. The teacher has to consider every matter. Before coming to the class, ask the students to bring some masks and this device could help to overcome students’ shyness and nervous.

Implementation

In teaching writing, the material is presented in systematic way. There are three teaching writing activities namely, pre-teaching activities, whilst-teaching activities, and post-teaching activities.

3.2.1 Pre-Teaching Activities

The purpose of pre-teaching activities is to help the students focus their mind on the topic by narrowing down the things that the students expect to write and active relevant prior knowledge that is already known. The processes in pre-teaching activity as follows:

a. Before the lesson start, the teacher asks the students to pray according to their belief.

b. The teacher checks students’ attendance and prepare the students according to physical and psychological point of view to follow the lesson.

c. The teacher introduces the topic, the topic is earthquake where the teacher announces the topic to the students by writing it on the board.

d. Brainstorming.

e. The teachers shows a thematic picture of the text and ask them to guess what would happen in that picture.

f. The teacher asks the students to think and express ideas that might be related to the topic. In this step, the teacher asks her students some questions and the students’ background knowledge, which is related to the topic.

3.2.2 Whilst-Teaching Activities

The whilst teaching activity helps the students find their ways through the writing
and build upon the expectation raised by pre-teaching activities. In this case, picture activity has to be designed to become interesting and fun in order that the students are motivated and get pleasure to write. The controlling of the teacher is needed in order the students do not get the difficulties in writing.

The teacher asks the students to form discussion groups. Discussion group can makes easy the teacher in teaching learning activity, because the students can be autonomous. The group consists of 3 or 4 people, in which each group there is a student who has a greater ability or clever, the goal that students can help each other and exchange ideas. The teacher asks every group of students make up a story or even based on picture. The teacher has to tell the group that the story has to be quite simple. Its purpose is to help the students understand the story’s performance easily. Yet the teacher can give another way, that is the teacher suggest the situation that can be developed into a story by the groups. For example, the teacher gives the students of the same picture for every group. Every group discusses their own story or based on picture given by the teachers. Every student has to involve in this activity, since this is participatory activity. While the groups discuss the material given, the teacher has to control this activity. One possibility is to ask the students to mind a story that have already known in hot issues or a story they have read in English. However, perhaps a more interesting approach is to set up a situation, which will involve into a story through students’ creative involvement. Below a picture text can be used as the example picture that can be used to teach.

The students need twenty minutes in discussing, making of story or event based on the picture. Then, the teacher invites the groups to present their performances. In addition, other groups can take their own notes while the performing group presents or tells their own group about the even on picture.

Picture above helps the students to write. Since it makes the students think that writing is not as hard as they think. In writing activity, the students of the other groups are asked to write down the story through picture in their groups. Not only groups take notes in their own paper, but also every students of each group has to take notes in their own paper. This aims at the students will not only be passive one, but can participate in this writing activity. When
they are writing, the teacher is important not to hurry the students, give them enough time to write. After they have finished their writing, then the teacher collects it.

3.3.3 Post-Teaching Activities

Review

Post teaching is intended to review the material they have got in whilst teaching. So, in this activity the teacher can test students by giving some questions, which measures the students’ ability to tell the topic that they have learned. In post-teaching activities, the teacher gives opportunities for the students to ask question if they still cannot understand. After the students understand about that, the teacher reviews again about the lesson for the students and leads the students to conclude the lesson.

Exercise

After the teacher reviews about the lesson, the teacher should gives the students exercise or homework for the students. By to do homework, the students can study and review again about the lesson at home.

Evaluation

Evaluation is something important to do because by evaluating students’ work, the teacher knows how far the students understood about the topic given. Before evaluating the students’ work, the teacher may give exercise. Teacher concludes the lesson today by asking students feedback. While the activity is going on, the teacher evaluates the students’ explanation about the topic. And also, the teacher should give reward to the students for their effort. It is very important because it can motivate the students to learn English as a foreign language.

Based on the procedure above, the writer thinks that procedure can increase students’ writing ability. Because the procedure is clear for the students and students have many opportunities to write.

D. Conclusions And Suggestions

Conclusions

There are four language skills that should be mastered by language learner. They are listening, speaking, reading, and writing. These skills are relating each others and cannot be separated. Writing is one of the most important skills in learning language beside listening, speaking, and reading. It is also more difficult than others. Writing is not a natural skill, because it cannot be acquired automatically and easily. Writing skill is different from other skills like speaking and listening.

In this case, the teacher can use media that can make the student’s interest in learning process. There are many media that can be used, one of them is picture. Picture is one of the visual aids. Pictures are used to support and help a teacher to interest the
students because it is considered as a part of visual aids that have many functions in the teaching process. They are also common in everyday life, picture can also be of key importance in communicative and interactive classroom.

Then, to write news item text, the teacher asks the students to form discussion group. Each of students in group of course wants to be the winner, so they will motivate themselves to write, to explore thought and idea, ect. After that, the teacher should reviews again about the lesson before doing evaluation. By evaluation, the teacher knows how far the student understands about the topic.

Suggestions

In this paper, the writer gives some suggestions for the teacher to use thematic picture as a media for teaching writing news item text. There are as follows:

a. The teacher should select thematic picture to make the students interest in teaching and learning process.

b. The teacher should try to show the thematic picture for all students in teaching writing news item text.
